

Pranalee Solaskar

Fullstack Developer

pranaleesolaskar@gmail.com | +91 9130107486 | Pune, Maharashtra 411047 | [LinkedIn Profile](#) | [Portfolio](#)

CAREER SUMMARY

Full Stack Developer with nearly 3 years of experience of experience building scalable web applications using **React.js**, **Node.js**, and **Python**. Skilled in **microservices architecture**, **REST APIs**, and **cloud deployment (AWS)**. Strong focus on performance optimization, secure authentication (OAuth2, SSO), Authorization and delivering high-quality solutions in Agile environments.

EXPERIENCE

Software Engineer, 11/2023 - Current

Reval Analytical Services Pvt. Ltd – Pune

- Designed and developed **scalable full-stack applications** using **React.js**, **Node.js**, and **Python**, improving application performance and supporting high concurrent user loads
- Built and optimized **RESTful APIs and microservices architecture**, reducing response latency and enhancing system scalability and maintainability
- Performed **database optimization** on **MongoDB and MySQL**, improving query performance and reducing data retrieval time by **30%**
- Developed **interactive data visualization dashboards** using **Highcharts and SpreadJS**, enabling better business insights and decision-making
- Implemented **secure authentication mechanisms (SSO, OAuth2)**, strengthening application security and ensuring compliance with best practices
- Automated backend workflows using **Python scripting**, reducing manual effort and improving operational efficiency
- Deployed and managed **cloud-based applications on AWS (Lambda, API Gateway)**, ensuring **high availability, scalability, and reliability**
- Collaborated in **Agile/Scrum environments**, contributing to sprint planning, task estimation, and timely feature delivery using **JIRA**
- Debugged and resolved **critical production issues**, improving system stability, reducing downtime, and enhancing user experience
- Worked on **performance optimization and code enhancements**, improving overall system efficiency and responsiveness

PROJECTS

IAC Refresh

- Optimized backend processing logic using **Python**, reducing execution time from **10 minutes to 2–3 minutes (~70% improvement)**
- Improved system efficiency through **asynchronous processing and optimized data handling**
- Built a **responsive UI using React.js**, enhancing usability and user interaction

Version Upgrade Project

- Led **system upgrade initiatives**, ensuring compatibility, improved performance, and enhanced security
- Integrated C# backend systems with Angular frontend applications for seamless operation.
- Ensured **zero downtime deployment**, improving system stability and reliability

EDUCATION

Master Of computer Application, GPA: 73.10%: 08/2023

Bachelor Of Computer Application, GPA: 73.43%: 10/2020

ACHIEVEMENTS

Awarded a Certificate of Outstanding Contribution to the Development Team.

SKILLS

Technical Skills

Languages: JavaScript, TypeScript, C#

Frontend Development: Angular, React, Bootstrap ,Html , CSS

Backend Development: Node.js, Python, .NET, REST APIs, API Integrations

Databases & Data : MySQL , MongoDB

DevOps & Cloud Tools: Docker, IIS, Shell Scripting, AWS (Lambda), Git, Postman, JIRA, Windows, Linux, Ubuntu
