Professional Summary

Full Stack Developer with 3+ years of experience designing and developing high-quality, testable, and scalable software solutions for enterprise financial platforms. Proven track record of delivering production-grade applications using React.js, JavaScript/TypeScript, and Node.js, with a strong foundation in REST API development and microservices architecture. Demonstrated expertise in deploying and managing cloud-native services on AWS (Docker, Kubernetes). A collaborative team player experienced in Agile environments, actively involved in project scoping, scheduling, and ensuring timely deliveries across cross-functional teams.

Technical Skills

Languages:	JavaScript, TypeScript, Python, C#, SQL
Frontend:	React.js, Angular, HTML5, CSS3, Bootstrap, Redux, Responsive Design
Backend:	Node.js, Python, .NET, REST APIs, Golang/javaMicroservices, GraphQL
Databases:	MongoDB, MySQL, NoSQL, Indexing, Query Optimization
Cloud / DevOps:	AWS (Lambda, API Gateway, S3, EC2), Docker, Git, CI/CD
Tools:	Postman, JIRA, IIS, VS Code, Jest, Swagger
Concepts:	System Design, OAuth2, SSO, JWT, API Integration, Agile, Scrum, SDLC, Unit Testing

Work Experience

Software Engineer Reval Analytical Services Pvt. Ltd., Pune	Apr 2023 – May 2026
- Designed and developed high-quality, scalable software solutions by engineering 8+ full-stack applications using React for business-critical financial modules, supporting 1,000+ concurrent users with a focus on performance and stability. - Architected and developed 20+ REST APIs and microservices using Node.js, achieving a 45% reduction in latency and stabilizing uptime across 6 distributed services, adhering to R&D best practices. - Demonstrated willingness to learn and work across different technologies by spearheading the end-to-end migration of a 6-module legacy stack to .NET Core and Angular 14, retiring 30+ vulnerabilities and doubling runtime throughput. - Enhanced/extended functionality by re-engineering the C#-to-Angular integration layer with versioned REST contracts, decoupling 10+ workflows and cutting cross-team integration defects by 55%. - Actively involved project stakeholders (managers, developers) to implement secure authentication flows using OAuth2 and SSO across React front-ends, securing 500+ user accounts and reducing unauthorized login attempts by 60%. - Automated 12+ backend workflows using Python, eliminating 20+ hours of manual effort and lifting team operational efficiency by 35%. - Developed cloud-native services by deploying 15+ microservices to AWS Lambda and API Gateway, sustaining 99.9% uptime and auto-scaling under 3x peak traffic load. - Ensured quality through functional, unit, and performance testing, resolving 100+ production incidents and refactoring 12+ components to cut recurring bug reports by 50%. - Participated in project scoping and scheduling within an Agile environment, tracking progress of individual tasks and collaborating with local and remote teams to ensure timely deliveries.	

Key Projects

IAC Refresh | React.js, Python, AWS, Backend Optimization

- Accelerated backend execution from **10 minutes to 2–3 minutes** across 50+ daily automation runs, delivering nearly **70%** end-to-end performance gain.
- Introduced asynchronous processing patterns and batched data handling, boosting workflow throughput by 3x for long-running enterprise jobs.
- Designed 5+ responsive React.js interfaces, trimming average page load time by 40% and increasing user session length by 25%.

Version Upgrade Project | Angular, C#, .NET, System Migration

- Spearheaded a large-scale upgrade across 6+ legacy modules, strengthening compatibility, runtime performance, and security posture by 50%.
- Integrated **C# backend services** with **Angular** frontend modules, enabling seamless cross-stack functionality across 10+ feature workflows.
- Executed zero-downtime deployments for 3 major releases, fortifying production reliability and reducing rollback incidents to zero during migration.

Education

Master of Computer Application	2021 – 2023
Sinhgad Institute of Management, Pune	
Bachelor of Computer Application	2017 – 2020
Maharashtra Institute of Technology, Pune	

Achievements

Earned Certificate of Outstanding Contribution among 200+ engineers for high-impact delivery and exceptional release quality.
